wrestling

Mr. kuhn, sealth's new p.e. teacher, took the wrestling team under his wing in its first year of metro competition. Wrestling offers an athlete an opportunity to excell in a sport based on individual ability — wrestling opponents in his own weight class. The option was **sealth's** to adopt either soccer or wrestling as one of the new varsity sports in 1969-70. Wrestling was chosen with the anticipation of soccer in 1970-71. The participation and interest in wrestling will determine its future at **sealth.**

sophomores

marsha takahashi
president

miss mcdaniels
advisor

The class of '72 can look back on this past year with the feeling of pride and accomplishment. As sophomores we have survived a new experience at **chief sealth** and have learned a great deal from it. Of the greatest value from our gained knowledge, is the way we have learned to work together, as a group, to achieve our goal. Regardless of whether our projects were succeeding or failing, we, the sophomores, would work together to obtain success and accomplish our goal. It was this ability to work together which made our first year at **sealth** a success.

It was an honor for me to serve as president of the sophomore class. There are so many people to thank, but first I would like to thank the great sophomore class officers for their time, patience, and hard work. I would also like to thank our great advisor, **miss mcdaniel** for a job well done. I'd hate to think of this past year without these people! Last but not least, I would like to thank each sophomore for making our year a success. Thanks to you we have completed our first year at **sealth** successfully and we can be proud of it! We have learned much this year and are proud of our year, but we anticipate even greater success in our final years at **chief sealth.**

class officers

a few words from dickie . . .

. . . take it away dick

It has been a wonderful year working with the class of '71. I am very happy to have had the support of the junior class, because it's the students that make a school year really great. The officers played an important part in organizing the students and their spirit to make the year enjoyable, and with all of our pride and pep the class of '71 will always be remembered at **chief sealth high.** I wish to thank all of the junior representatives, committee chairmen, and members. Special thanks are extended to the junior officers and **mrs. lannoye** for all of their combined efforts. They are the important ones in the class of '71. Their involvement in school activities has made this a very successful year. I'm sure that we can expect more accomplishments and more fun next year than ever before!

As the conclusive year of our enrollment at **chief sealth** terminates we recognize how rapidly the time has passed. Reminiscing we can see we have been fortunate in that every year for us has been reason for our pride as **seahawks.** Ventures for academic as well as athletic perfection appears to have become a custom at **chief sealth** and the class of '70 has taken no exception. Our members have procured not only local but national recognition, for outstanding scholastic accomplishments from our male and female athletes in numerous regions of competitive activities. Accompanying the traditional social and fund raising events of our class has come the crackerjack and great pumpkin card sales. Also, was the very successful computer dance and senior sponsored rock concert which added to our entertainment. I especially would like to thank the committee heads, senior representatives, and all the numerous individuals who showed, by helping and participating, that they were proud of being a **senior.**

mr. bell's analysis of today's youth

One of the most significant characteristics of today's youth is their desire for participation. I believe that our schools can be improved as we develop ways to assist the student in better understanding his problems and in the mastery of techniques for building the kind of world in which he wants to live. To a degree possibly never before experienced, much of society's image of today's youth is one of discontent, of alienation, and of bewilderment. Society knows also that this image is created by a minority of today's youth whereas the majority is seriously involved in securing the best possible education through the many opportunities provided.

The real purpose of education is to help the individual grow to the fullest realization of his potential.
